

THANK YOU...

WELCOME

A gift to the University of Liverpool will have an impact long into the future. Whether you have chosen to support talented individuals, touch the lives of millions through our groundbreaking research, or enhance the lives of our students through the Benefactors' Fund, your donation will be an investment that will influence generations to come.

We have had an outstanding year for fundraising at the University, with your gifts supporting a number of initiatives that would not otherwise have been possible. In particular, I would like to mention the donors who left a bequest to the University in their will this year; we received a record number of legacy donations which really have had a transformational impact.

I am personally very proud of the University's expanding international graduate body and I am delighted that our US foundation, University of Liverpool in America Inc, has had its most successful fundraising year to date. We are in the process of setting up a similar entity in Hong Kong which will be fully established by the summer. Over the next three years many of our supporters in Hong Kong will have their donations matched, thanks to a fund endowed by the Tung Foundation, which will double the value of the initial gift. So there really is no better time to become a supporter.

Through your donations to the Benefactors' Fund, we have been able to invest in our teaching and learning resources, enabling us to maintain our reputation for offering an excellent student experience, and we have also helped a number of gifted students to pursue research which is addressing some of the biggest global challenges.

I hope that you enjoy reading about the many ways in which your contribution has helped to change lives and shape the future of our University. Thank you for your continued commitment.

Professor Sir Howard Newby CBE Vice-Chancellor

(())

We have had an outstanding year for fundraising at the University, with your donations supporting a number of initiatives that would not otherwise have been possible.

INCREASED DONATIONS, IMPROVED FACILITIES

HOW YOUR GIFTS HAVE BEEN INVESTED

GIANT DISPLAY GLOBE

A giant, three-dimensional globe showing the geographic characteristics of the Earth has been purchased for our award-winning £23 million Central Teaching Laboratories.

The 40" globe is located in the atrium of the Environmental Sciences floor and will be used by undergraduates and lecturers as well as hundreds of school pupils and teachers visiting the University as part of their outreach work.

(())

It is well known that many students have trouble thinking in 3D, and this problem is exacerbated by the usual viewing of maps as flat projections. The globe is therefore invaluable in warding off the plague of 2D thinking. More generally, having such a large and three-dimensional model of our Earth on constant view will provide some context for our studies of the environment, and serve as a reminder of why we chose to study the Earth in the first place.

Dr Isabelle Ryder Department of Earth, Ocean and Ecological Sciences

INNOVATIVE STUDY ZONE

A new study area has been introduced in the Sydney Jones Library which is designed to provide a collaborative working space for students undertaking group work.

Boasting state-of-the-art technology, including interactive projectors that communicate with laptops and other mobile devices, the innovative facility makes it easier for students to work in groups – an increasingly important element of undergraduate teaching and learning.

"

Working in groups and giving effective presentations are now important aspects of student learning. Our grant from the Benefactors' Fund is allowing us to achieve a dramatic improvement in the way the Library supports these activities. It's exciting for us to be able to provide our students with facilities that are in advance of anything that their peers at other universities will have access to.

Phil Sykes University Librarian

"

Having a Virtual Bench at the University of Liverpool will take the experience of hundreds of undergraduate students to a rare level of originality. There are only a handful of Virtual Benches worldwide and it is far beyond the ordinary laboratory teaching equipment one expects to find in even the most prestigious of universities. The bench greatly enhances the uniqueness of the student experience in Engineering at Liverpool.

Dr David Dennis Centre for Engineering Dynamics

STATE-OF-THE-ART ENGINEERING FACILITIES

Students will experience what it is like to be a real-life test engineer, thanks to the purchase of a Virtual Engine Test Bench in the School of Engineering.

The unique facility, which is only the second of its kind in the UK, simulates the equipment that test engineers use in industry, offering students a more visual and interactive learning experience and helping them to understand the behaviour of a turbofan engine.

It will be used extensively to enhance teaching across a wide range of modules as part of the Aerospace Engineering, Mechanical Engineering, and Engineering undergraduate programmes, benefiting around 675 undergraduate students each year, and will also be used as a key selling point for student recruitment.

ANATOMY ULTRASOUND

Medical students are taking advantage of a new ultrasound machine which can produce real-time two and three-dimensional images of the human body, as well as visualisation of blood vessels and blood flow.

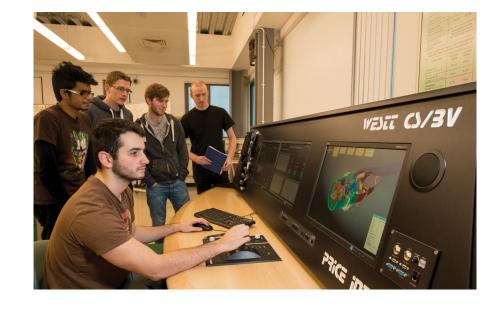

The equipment will enhance small to medium group teaching of anatomy to undergraduate students from a wide variety of programmes including Medicine, Dentistry, and Anatomy.

It is hoped that having access to this equipment will help to improve students' competence and enable them to become confident at an early stage with an imaging modality which is increasingly common in clinical practice.

"

Using the ultrasound equipment has been the highlight of both my first and second year anatomy lessons – being able to see the volunteer's heart beating and the outline of his atria and ventricles on the screen was fascinating; the equipment provides a new method of learning and greater depth to the subjects we are studying. I can't wait to use it again!

Rebecca McKnight Second year Medical student

ATTRACTING THE BRIGHTEST STUDENTS

We pride ourselves on being a leader in the Russell Group in terms of Widening Access, providing educational opportunities to those students who are most able but least likely to come to university.

This is a key area of focus for our fundraising activity, enabling us to maintain our high academic standards and reputation by attracting the brightest students to Liverpool.

Philanthropic support to this area of activity enables us to grow and broaden our access programmes, helping to ensure that finance is not a barrier for any of our students, and supporting them throughout their student experience.

Access and excellence scholarships, travel bursaries, subsidised internships and exchange programmes funded through philanthropy have a dramatic impact on the future prospects of our graduates. Michael Mohebbi from our Educational Opportunities team explains:

"Students from underrepresented backgrounds often face financial challenges, especially those who are the first in their family to go to university. Trying to hold down part-time work alongside full-time study can be tough and detract from the student experience. Support to this area makes such a difference, enabling our undergraduates to enjoy a richer student life, worry less about money, and focus on immersing themselves in the university experience."

"

Knowing I had additional support helped me to focus on my studies even through difficult times. I felt privileged to be given such an opportunity and I wanted to make the most of it.

Abbie Harrison Year 1 Physiology student

SUPPORTING LEADERS OF THE FUTURE

Change is effected through great leadership, and our aim is to educate globally minded, socially responsible leaders who will make a significant impact on our world.

Our global network of graduates hold leadership roles in business, politics, education and the third sector, and the University is striving to nurture the next generation of leaders and thinkers to follow in their footsteps. We offer a number of scholarships to support gifted students to pursue postgraduate study which have been funded thanks to the generosity of our alumni community and supporters.

PAUL ROY Mba scholarship

The inaugural Paul Roy MBA Scholarship has been awarded to Julie Allen (BSc Psychology 2013).

The scholarship, which covers full tuition fees, was established by alumnus Dr Paul Roy (BA Hons Economics 1968, Hon LLD 2009) to support promising MBA students wishing to pursue a future career in finance or enterprise.

Julie, who lives in Warrington, came to university after having children and working for a number of years in sales. She decided that to progress her career she needed a degree and took the brave step of leaving her job to enrol on a college course before beginning her undergraduate degree at Liverpool.

"It's not just the money; it's a pat on the back and an acknowledgment of all of the hard work and long nights studying," said Julie. "The scholarship is priceless, but for me the recognition is worth more than the money, because it says that people believe in me."

ULMS 10TH ANNIVERSARY MBA SCHOLARSHIP

This has been a particularly exciting year for the University of Liverpool Management School (ULMS). As well as celebrating its 10th anniversary, the School has achieved AACSB accreditation, placing it within the top 5% of business schools worldwide. To commemorate these significant achievements, the School launched a fundraising appeal to encourage alumni to provide support for gifted students undertaking an MBA.

Current scholarship recipient Kiruba Shankar said: "I am both humbled and proud to be the first recipient of the ULMS 10th Anniversary Scholarship. Knowing that graduates of the School have gone on to benefit organisations, communities and societies worldwide instils me with great pride and determination to fulfil the expectations of being a Management School scholar."

"After graduation I would like to return to India and work to improve supply chain management in local agriculture. In this way the impact of the scholarship will be felt by me and my family, and I will strive to utilise what I have learnt to create a positive impact on our community."

THE SIR JOSEPH ROTBLAT ALUMNI SCHOLARSHIP

The Sir Joseph Rotblat Alumni Scholarship supports alumni returning as postgraduate research students, and recognises both academic merit and financial need.

The scholarship, which was named after former University lecturer and Nobel Peace Prize winner Professor Sir Joseph Rotblat (PhD 1950, Hon DSc 1989), is available to all graduates of the University wishing to undertake a PhD.

This year's recipients are Grace McGuire (BSc Hons Psychology 2012, MSc Investigative and Forensic Psychology 2013) and Daniel Brown (MA Archaeology 2012).

Grace's PhD is researching the effectiveness of intervention programmes which are designed to prevent those who have committed domestic or sexual abuse from reoffending, while Daniel's PhD in Archaeology is helping to decipher forms of non-verbal communication embedded within Etruscan clothing in tomb wall paintings.

"

Without the alumni community my involvement in this project would not be possible.

Grace McGuire Sir Joseph Rotblat Alumni Scholar

It was an unbelievable surprise to learn that I had been selected for this scholarship. It's always been my ambition to become an academic researcher and I've worked really hard to get the best results so that I would be in a position to fulfil that goal, but I knew money could be an obstacle as I didn't have the financial resources to fund postgraduate study.

However thanks to the support of this scholarship I've had the opportunity to undertake a PhD in Archaeology studying aspects of identity and cultural expression within Etruscan clothing and adornment as depicted in the tomb wall paintings at Tarquinia in the Monterozzi necropolis. My research focuses on deciphering the forms of non-verbal communication embedded within the clothing; not only will this serve to elucidate our understanding of this ancient and often maligned culture, but it will also impart a greater understanding of identity formation and expression which could be applied to contemporary contexts. This is vital so that we can establish how identities are formed, how they are expressed, and how they are sustained, because identities continue to be the source of much strife and conflict.

It is invigorating that my commitment and ability has been recognised and that among so many talented and deserving applicants I have been selected for this scholarship. Without this support I would not have been able to achieve my goal and I cannot overemphasise my gratitude to be a recipient.

Daniel Brown (MA Archaeology 2012)

Thank You

"

I couldn't believe it when I heard I'd got the scholarship! I actually thought it was a mistake. I'd been applying for jobs when I found out, but I'm so glad I can continue in academia. I love Liverpool – it's such a vibrant city and it reminds me of Berlin, so it's always felt like home.

Maike Pötschulat 2013 Adrian Ringrose Scholar

ADRIAN RINGROSE SCHOLARSHIP

The first Ringrose scholarship has been awarded to alumna Maike Pötschulat (MSc Urban Regeneration and Management 2013).

The scholarship was established thanks to a gift from alumnus Adrian Ringrose (BA Hons Political Theory and Institutions 1988). Chief Executive Officer of Interserve, one of the world's largest service, maintenance and building groups. It supports postgraduate students whose work falls under one of the University's seven research themes, Changing Cultures, which explores the cultural impact of urban regeneration, migration and mobility, digital media, and cultural understanding of health issues.

Maike will be researching the phenomenon of Studentification, which occurs when a growing, often international. student population 'take-over' traditionally non-student neighbourhoods. altering the social and cultural balance and, over time, influencing the area's infrastructure. She will focus her research on student interactions with an area's cultural and social life and the perceptions of local residents living in close proximity to student halls or house shares both in Liverpool and Maike's home city of Berlin.

PARTICLE PHYSICS Alumni studentship

Alumnus Dr Clive McLintock (BSc 1959, BSc Hons Metallurgy 1960, PhD 1963) has made a donation to the University to launch an Alumni Fund for a PhD Studentship in Particle Physics.

The recipient of the studentship will have the opportunity to work at the forefront of international science, exploring the further development of the Large Hadron Collider which played a crucial role in the discovery of the Higgs boson particle in 2012. They will also be given the opportunity to spend time at the CERN laboratories in Geneva.

Dr McLintock's gift will establish a pound-for-pound matching fund to encourage other alumni to support the initiative and help fund additional future scholarships, and to ensure that the University retains its groundbreaking position in global science. The first studentship will be recruited to start in October 2014.

To find out more, or to make a donation to the fund, please visit www.liverpool.ac.uk/giving/particle-physics

Dr Clive McLintock

DUNCAN NORMAN Scholarship

This year marks the 10th anniversary of the highly prestigious Duncan Norman scholarships scheme which was established in 2004 by a donation of $\pounds 1$ million from The Duncan Norman Charitable Trust.

The scholarship enables academically gifted students who are considered to have the personal qualities to make them leaders in society to pursue MPhil/PhD study at the University. It was set up in memory of the late Duncan Norman, whose descendants are now among the Trustees.

During his lifetime, Duncan was Chairman of the Liverpool-based Owen Owen and TJ Hughes department stores and had a great affinity with the University, including serving terms as President of Council and Senior Pro-Chancellor. He was awarded an Honorary Doctorate of Laws by the University in 1964 and his portrait now hangs prominently in the University's Foundation Building.

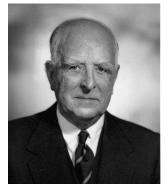

Richard Asser, Chair of the Trustees, said: "We are delighted by the success of the programme over the past 10 years and continue to be impressed by the quality of students and their research. I am particularly pleased to see how the scholarship has benefited past recipients and the success they have gone on to achieve. The Trustees look forward to continuing their partnership with the University into the future."

This year's recipient of the Duncan Norman Scholarship is William Green, a graduate of Christ Church, Oxford. His thesis will explore Richard Wagner's music and its continued cultural impact.

"

My tutor at Oxford had encouraged me to apply to other institutions to study for a masters degree, before possibly returning to Oxford to do a PhD. When I heard about the studentship in Musical Analysis that was being offered by the University of Liverpool and discovered that the research interests of my potential supervisors neatly coincided with my own, it seemed like the perfect choice.

William Green 2013 Duncan Norman Scholar

Duncan Norman

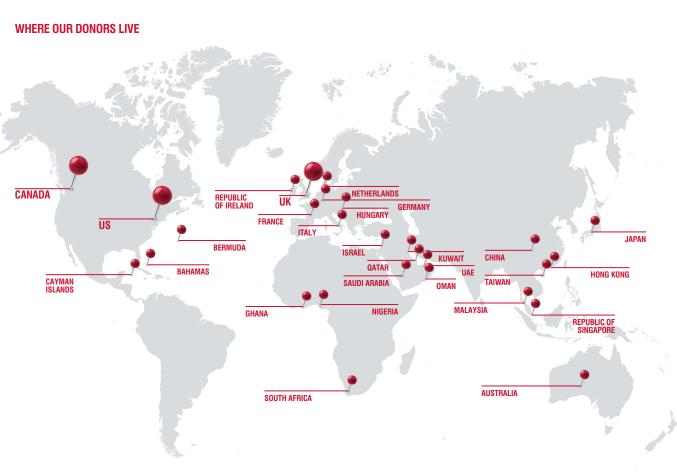

A GLOBAL NETWORK OF INVALUABLE SUPPORT

As the University's networks expand and develop across the world, the role that our global community play in terms of philanthropic support is invaluable. Donations from alumni living outside the UK represent 10% of our total funds raised and make a significant contribution to the continuing success of the University.

The University's independent charitable organisation, University of Liverpool in America Inc, continues to grow, and plans are progressing to establish an independent charitable foundation in Hong Kong this summer.

Through these international foundations, alumni are able to retain and strengthen their connection with Liverpool, while offering their support in a tax-efficient way.

The University also has prescribed foreign educational institution status with the Canada Revenue Agency. This means that donors in Canada who support the University can claim a non-refundable tax credit on their income tax return. As a qualified recipient, the University is also eligible to receive gifts from Canadian registered charities.

211,510

We have raised \$11,510 on the strength of two telephone campaigns to the US and Canada

SUPPORTING **NEW DEGREES**

This year University of Liverpool in America Inc received a generous donation of \$50,000 from PepsiCo on approval of the Board of Directors, the gift will be directed to support a specialist 'Big Data Business Management' masters degree at our Management School.

The 'Big Data' industry is valued at more than \$100 billion and is arowing at more than 10 percent per year – greater than the rest of the software industry combined. The programme aims to give students the skills needed to become consultants, managers and executives who rethink data and make sense of and communicate 'Big Data' in ways which provide useful business insights to organisations. It will also link with research interests in other Schools within the University. including Computer Science. Mathematics and Engineering.

PepsiCo's contribution was facilitated through the support of alumnus Dr Mehmood Khan MD (MBChB 1981), PepsiCo's Executive Vice-President, and Chief Scientific Officer, Global Research and Development. In recent years Dr Khan has returned to Liverpool to visit his alma mater, meeting with scientists, academics and students and delivering a talk at the Management School.

TUNG LIVERPOOL SCHOLARSHIP

The Hong Kong-based Tung Foundation has launched a 'Tung Liverpool Scholarship' for Hong Kong and Chinese students studving at the University of Liverpool.

Founded by the late CY Tung - father of Liverpool graduates, CH Tung and CC Tung - the Foundation supports social. cultural and educational causes.

The donation is supporting three areas: an enhanced award for selected students from the Hong Kong Graduate Association Scholarship programme: a dedicated postgraduate research award: and a matching donation fund

The scholarship will provide an enhanced award to undergraduate or masters students studving on nonclinical taught programmes at Liverpool who have already been successful in their application to the Hong Kong Graduate Association Scholarship. It will also offer PhD candidates from Hong Kong and mainland China the opportunity to undertake research at the University.

The Tung Foundation has also designated part of its donation towards a matched funding programme for donors in Hong Kong to encourage and maximise gifts to the University. This will be available for the next three years and will assist the University's fundraising activities in Hong Kong, as well as initiatives such as student exchanges and research.

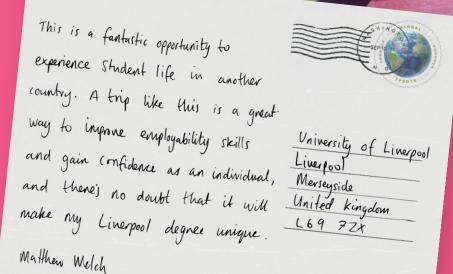

FUNDING EXCHANGES AND SCHOLARSHIPS

Since its launch in 2010, University of Liverpool in America Inc has continued to grow, with 2013 proving to be a record year for donations from US-based alumni and supporters.

Gifts to University of Liverpool in America Inc have already provided grants to the University to fund exchange and scholarship opportunities. Several students from across all three University Faculties have been able to spend time studying at US institutions, which has provided social and academic benefits for those involved and helped to make their Liverpool degree unique. We now want to grow this programme to support PhD studentships for the brightest research students, and to give undergraduate students who would otherwise not be able to come to the University the opportunity to study for a Liverpool degree.

Plans are also in place to develop a US internship programme. which will offer Liverpool students opportunities to spend time working with American businesses. The programme will help participants to acquire and develop practical knowledge and skills in the workplace. improve their future employability, and provide a real competitive advantage when they graduate. The programme is also intended to strengthen alumni connections and networks in the US by involving US-based alumni in the placement of students in their company.

History student Matthew Welch is one of this year's recipients of the University of Liverpool in America Inc Scholarship. He is spending this semester at the University of Maryland, one of our worldwide partner institutions.

SUPPORTING GROUNDBREAKING RESEARCH

IMPROVING CANCER RESEARCH CAPABILITY

Head and neck cancer patients in Liverpool may soon benefit from new treatments, thanks to a £130,000 state-of the-art laboratory at Aintree University Hospital.

Jointly funded by Aintree University Hospital and the University, together with a donation of £60,000 from the Johnson Foundation, the lab will allow researchers who are currently based five miles away at the University to collect and prepare samples on site, which is essential for many research projects.

The Johnson Foundation provides financial support to local education, sport, health and youth projects on Merseyside. Peter Johnson, Chairman of the Foundation, chose to contribute to the lab after a friend received treatment for cancer at Aintree University Hospital.

> £60,000 TO IMPROVE CANCER TREATMENTS

RESEARCH INTO CHILDHOOD BOWEL DISEASE

The University has received a grant of £25,000 from the Crohn's & Colitis in Childhood (3Cs) charity to fund a research post in the Wolfson Centre for Personalised Medicines.

Grant recipient Dr Anastasia Konidari will be researching paediatric inflammatory bowel disease, a lifelong, incurable disease which has a severe impact on childrens' lives and the lives of their families, requiring multiple clinic visits, hospital admissions, surgery, and cancer screening.

Anastasia will study the efficacy of certain medications, specifically a new drug transporter called ABCB5, to establish how genetic differences between children can influence their response to the drug.

The Centre for Personalised Medicines, which is housed in the refurbished Old Royal Infirmary on the north side of the University campus, was opened in 2007 following a successful fundraising appeal which raised a total of £2.5 million.

FUNDRAISING FOR NEW CHILD HEALTH INSTITUTE

The University is raising £10 million to help build an Institute for Child Health as part of Alder Hey Children's Hospital's new state-of-the-art campus, Alder Hey in the Park, which will offer leading care and treatment facilities for children.

The Institute, part of one of Europe's leading hospitals, will enable us to further build on our existing excellent research track record in this field, providing the expertise, talent, equipment and facilities to push forward breakthroughs in treating childhood infectious diseases, cancer, asthma, cystic fibrosis and lupus.

The facility will also give us the research capacity to work with a greater number and variety of children's healthcare and research organisations throughout the UK and overseas.

£25,000 TO FUND RESEARCH INTO BOWEL DISEASE

(())

Making a gift to the University of Liverpool's Head and Neck Cancer Team at Aintree allows me to show my appreciation for the way they have looked after a good friend of mine. It is heartening to know the difference this gift will make for head and neck cancer research at Liverpool, as they strive to treat more patients and continue to be at the forefront of this cancer speciality.

Peter Johnson Chairman of the Johnson Foundation

LEGACY GIFTS LEAVE A LASTING IMPRESSION

The University has benefited from a record number of legacy bequests from alumni and other supporters over the past year, with more than $\pounds 2$ million received in total. These donations, ranging in size from $\pounds 1,000$ to $\pounds 1$ million, have been directed to support projects across all three of our Faculties and demonstrate the wide variety of areas across the institution that donors choose to support.

We receive around a quarter of our philanthropic donations from legacy gifts. This support is vital so that we can continue to improve the quality of the student experience we offer at Liverpool, to provide scholarships and bursaries, and to fund vital research which has an impact on a global scale. Recent legacy gifts have funded a lecture series in the Department of English, the refurbishment of the Sydney Jones Library, two veterinary PhD studentships in the Institute of Infection and Global Health, and student research support in the Department of Electrical Engineering and Electronics.

A legacy bequest of any size is an investment in the education of thousands of students and the future of the institution. It could also significantly reduce inheritance tax liability.

If you are interested in discussing a legacy gift, or would like help with suggested wording for inclusion in your will, please contact Stephen Kehoe on +44 (0)151 795 4637 or email: stephen.kehoe@liverpool.ac.uk

Dr Nicola Williams from the Department of Epidemiology and Population Health pictured with PhD student Emma Ormandy

(())

The Marjorie Forrest Bequest has provided me with the freedom to begin my PhD and helped me to invest in my future research career. Without the bequest, further full-time study would simply not have been viable.

Emma Ormandy Marjorie Forrest PhD Studentship Recipient

MARJORIE FORREST PHD STUDENTSHIPS

University supporter Marjorie Forrest left a legacy to the School of Veterinary Science to contribute towards Veterinary research. Her gift has helped to fund two PhD students – Emma Ormandy, from the Institute of Infection and Global Health, who is investigating the transmission of antibiotic resistance between people and dogs; and Katie Lee from the Institute of Ageing and Chronic Disease who is looking at tendon and ligament injuries in horses, dogs and humans. Katie's work aims to understand where ligament stem cells are located and what sort of environmental components will allow stem cells to heal tendon and ligament injuries.

TOTAL MONEY RECEIVED FROM LEGACIES IN THE PAST YEAR

(())

Leaving a legacy allows me to show my appreciation for the way that the University has honoured both me and my late husband and it's very rewarding to know that this gift will truly benefit all concerned.

Pat Dyson

PAT DYSON LEGACY GIFT

Pat Dyson, a long-standing supporter of the University, has chosen to leave a gift to the University in her will.

Pat has had a long association with the University and has supported us in a variety of ways for many years. Her husband Arnold, a former Mr Universe. used to run a gym on the campus in Oxford Road where he trained students, staff and the general public in weight lifting and actively promoted health and wellbeing.

Hall of Fame which was created at the Sport and Fitness Centre to celebrate the careers of some of our most successful sporting alumni and sporting figures associated with the University. Tragically he died in the summer of 2009 however Pat continued

her relationship with the University and decided she would like to set up a sports scholarship in his memory. This scholarship is now awarded annually at the Athletic Union Dinner.

Over the years Pat has supported a number of student sports clubs and purchased various pieces of equipment in her husband's memory, however her personal passion is animals and animal welfare, and she has also donated a number of gifts to the Small Animal Teaching Hospital. contributing much-needed funds Arnold featured in the University's for surgical equipment and kit.

> In 2010, Pat confirmed she wanted to leave a legacy to the University of Liverpool and we are delighted she has felt inspired by the work of the University to make this commitment.

LEGACY BEQUEST INFORMATION FORM

Please consider the University when you are preparing your will. Legacy gifts benefit the University long into the future and are a great way to leave your mark on the institution.

A LONG ESTABLISHED HISTORY OF GIVING

The University of Liverpool was built on philanthropy. Over the last 130 years donations large and small have helped to shape our University campus, student experience and world-class research.

1881

Liverpool ship owner and merchant William Rathbone

raised £80,000 to establish

which later became the

University of Liverpool.

University College, Liverpool,

1892

The Victoria Building was constructed following a public appeal to raise funds. Contributions were received from prominent local philanthropists including sugar magnate Sir Henry Tate and Sir William Hartley, founder of the Hartley's jam company.

1984

The Friends of the University of Liverpool was established, bringing together people with an interest in the University to fundraise and support its activities.

2011

The Benefactors' Fund, which supports scholarships and projects that enhance the student experience, reached £1 million through alumni donations.

1998

The University Graduate Association (Hong Kong) established a scholarship programme to support students from Hong Kong and China studying at Liverpool.

1936

A gift of £100,000 from Harold Cohen made it possible for a new library to be built. Unfortunately, Harold Cohen died suddenly on the day he was due to lay the foundation stone for the library.

2008

The Institute of Irish Studies, the first of its kind in Britain, received a £5 million endowment from the Irish Government to establish the Tony Blair Chair of Irish Studies.

MAKE A DIFFERENCE

Inspiring people to learn and achieve, we enable them to make the most of life. And addressing some of the world's toughest challenges, our research is helping to transform lives.

Our University is helping to solve some of the biggest issues facing society. Every day, scientists and academics at the University of Liverpool are achieving things you may never have thought possible. Their discoveries, inventions and achievements could completely transform the way we live, both now and in the future.

We want to maintain our status as a leader in enabling the most talented students to access a world-class education, regardless of background, and to provide outstanding opportunities for their personal and professional development to nurture tomorrow's leaders and thinkers, and to inspire and influence Liverpool's Nobel Laureates of the future.

Every one of our supporters has the power to play a role in our University's future.

Giving to the University is quick and easy and could help to change lives.

To make a donation or to find out more about our fundraising priorities, please visit: www.liverpool.ac.uk/alumni/donate email: giving@liverpool.ac.uk or call: +44 (0)151 795 4608.

Alternatively, use your smartphone to scan the following QR code, which will take you directly to our donation pages.

Sign up to the University's Give as you Live shopping app and you could raise money for the University every time you shop online at no extra cost to vou!

Thousands of stores have signed up and agreed to donate a percentage of your shopping bill to the University whenever vou make a purchase. All you need to do is register, choose the University as vour chosen charity, and start shopping! Visit www.liverpool.ac.uk/giveasyoulive today and see how easy it is to help.
