Dual Use: Overview

These categories are very wide ranging in scope and the main areas the University falls within scope of. If you operate in or across any of the areas below it is important you familiarise yourself with the control categories to understand the technical thresholds associated with those items and whether your current or prospective activities could fall within scope.

It is important to understand when exporting technology, it needs to hit the technical threshold details such as physical parameters or capabilities, if it doesn't hit the threshold the item is not controlled

Full details can be found on the consolidated list.

Category	Description
0	Nuclear materials, facilities and equipment
1	Special materials and related equipment
2	Materials processing
3	Electronics
4	Computers
